

Storm Quick Reference - Example Storm Operations For a complete list of operations and commands, see the Storm Reference Guide.							
Operator	Meaning	Example	Query / Question				
Lift							
=	Simple lift	inet:fqdn=vertex.link	Show me the FQDN vertex.link				
n/a	Lift forms	inet:fqdn	Show me all the FQDNs				
#	Lift by tag	<pre>#rep.eset.sednit</pre>	Show me all the nodes tagged #rep.eset sednit (i.e., that ESET associates with Sednit)				
#	Lift form by tag	hash:sha1#rep.eset.sednit	Show me all the SHA1 hashes that ESET associates with Sednit				
Filter							
+	Include	<pre>inet:ipv4#rep.talos.tick +:asn=4663</pre>		Show me the IPv4 addresses that Talos associates with Tick that are part of AS4663			
-	Exclude	<pre>inet:fqdn#rep.feye.fin7 -#cno.infra.dns.sink.ho</pre>		Show me the FQDNs that FireEye associates with FIN7 except for the ones that are sinkholed			
Pivot							
->	Pivot out	<pre>inet:fqdn=elaxo.org -> inet:dns:a</pre>	For the FQDN elaxo.org, show me its DNS A records				
-> *	Pivot out (wildcard)	file:bytes#rep.paloalto.conti -> *	For the files that Palo Alto associates with Conti, show me all the nodes those files reference ("point to") (i.e., pivot from the files' properties to the nodes for those properties)				
<- *	Pivot in (wildcard)	file:bytes#rep.paloalto.conti <- *	For the files that Palo Alto associates with Conti, show me all of the nodes that reference ("point to") those files (i.e., pivot from the files to any nodes where the file is a property)				

Traverse				
-(<edge>)></edge>	Traverse named edge (out)	media:news:publisher:name=mcafee -(refs)> *	Show me all of the objects (hashes, URLs, etc.) referenced by any McAfee news articles (blogs, whitepapers, etc.)	
<(<edge>)-</edge>	Traverse named edge (in)	inet:fqdn=check-update.ru <(seen)- meta:source	Show me all of the data sources that have seen / provided data on FQDN check-update.ru	
-(*)>	Traverse any / all edges (out)	media:news:publisher:name=clearsky -(*)> *	Show me all the things linked by any light edge to any news articles by Clearsky	
<(*)-	Traverse any / all edges (in)	inet:ipv4=195.62.52.93 <(*)- *	Show me all the things IPv4 195.62.52.93 is linked to by any light edge	
Pivot and Trav	/erse			
> *	Pivot and traverse out	file:bytes#rep.feye.icefog> *	Show me all the things referenced by or linked to (by any light edge) the files FireEye associates with IceFog	
< *	Pivot and traverse in	file:bytes#rep.feye.icefog < *	Show me all the things that reference or link to (by any light edge) the files FireEye associates with IceFog	
Pivot / Travers	se and Join (naviga	ate to results and keep the source nodes)		
-+>	Pivot and join	<pre>inet:fqdn=elaxo.org -+> inet:dns:a</pre>	Show me the FQDN elaxo.org and its DNS A records	
-(<edge>)+></edge>	Traverse and join	media:news:publisher:name=mcafee -(refs)+> *	Show me the articles published by McAfee and all the things referenced by those articles
